Research Experience

University of Michigan
Research Assistant

Sept. 2018 - Present

- Currently designing and building novel social computing systems that are *consentful*—systems that protect people’s interpersonal consent in interactions.
- Theorized how social platforms can be built to ensure online interactions are consensual based on affirmative consent (“yes means yes”). [c1]
- Built *Sig*, a Chrome extension that computes and renders synthesized social signals (S3s) on social platforms. S3s are social signals computationally derived from an account’s history (e.g., behavior of posting toxic content), and then rendered on the profile. Conducted a field deployment study including surveys and interviews to evaluate Twitter users’ experiences of using *Sig*. [c3]
- Built ML models to identify potential Russian trolls on Twitter, using an unbalanced dataset of 2.2K Russian troll accounts released by Twitter and 170K control accounts. [c2]

Sassafras Tech Collective
Software Development & Research Intern, advised by Dr. Jill Dimond

May 2020 - Aug. 2020

- Conducted (remote) usability testing of a client’s moderation system.
- Based on the usability testing results, designed mockups and further developed the moderation system.

Haystack Group, MIT
Undergraduate Research, advised by Dr. Amy X. Zhang and Dr. David Karger

Apr. 2017 - Apr. 2018

- Investigated how various factors affect the outcome of Request for Comments (RfC), a deliberative discussion on Wikipedia, by using mixed methods: 1) interviewing Wikipedia editors and 2) creating and quantitatively analyzing an English RfC dataset. [c4]

MIT App Inventor, MIT
Undergraduate Research, advised by Dr. Hal Abelson

Oct. 2016 - May 2017

- Enabled novice programmers to create modular code in the App Inventor, by developing customized blocks within the system that can execute any functions of an imported API.
- Implemented virtual reality (VR) blocks in the App Inventor to help novice users build VR apps. [c5]

Soft Active Materials Lab, MIT
Undergraduate Research, advised by Dr. Hyunwoo Yuk

Sept. 2016 - Feb. 2017

- Developed 3D printing based soft robotic hands with stand-alone actuation and control system.
- Implemented the software interface for precise 3D printing for advanced soft materials.

Leadership

Social Media Research Lab (SMRL), University of Michigan, Student Coordinator	Fall 2020 - Winter 2021
Michigan Interactive and Social Computing (MISC), Student Organizer	Fall 2020 - Winter 2021
Doctoral Executive Committee (DEC)	Fall 2019 - Winter 2020

- DEC is a group of PhD students that represent the voice of PhD students at University of Michigan's School of Information.
- Organized social events and actively participated in addressing departmental issues that impact PhD students.

Skills

Programming Languages. Python, C, Java, Ruby, JavaScript, HTML, CSS, MATLAB, SQL

Research Methods. Interview, System building & User study, Usability testing, Survey, Machine Learning

Web framework. Django, Flask, Ruby on Rails

Software. GitHub, L^AT_EX, Linux command line

Coursework

Ph.D. courses

Technologies to Optimize Human Learning, Microarchitecture, Computer & Network Security, Human-AI Interaction, Data Mining, Doctoral Foundations Seminar, Human-Computer Interaction, Qualitative Research Methods, Interpretivist Theories in Computer-Supported Cooperative Work/Social Computing, Research Methods

Computer Science & Math undergraduate courses

Programming Language, Data Structure, Algorithms, Computer Architecture, Data Communications, Probability and Random Process, Calculus with Lab I, Computer Programming I, Introduction to Linear Algebra, Operating Systems, Artificial Intelligence, Databases, Embedded Systems, Internet Protocols, Discrete Mathematics, Theory of Computation, Advanced Computer Programming & Lab, Project for Graduation, Introduction to Inference, User Interface Design, Intelligent Multimodal User Interfaces
