Research Experience

Facebook

June 2021 - Aug. 2021

User Experience Research Intern, advised by Scarlett Sheng (other mentors: Rui Yang & Ayesha Zafar)

- Impacted Facebook's privacy strategy by doing foundational mixed-method research to understand users' perception of consent in the context of online behavioral advertising and App Tracking Transparency.
- Quantitatively analyzed existing survey data to understand Facebook advertisers' goals.

Sassafras Tech Collective

May 2020 - Aug. 2020

Software Development & Research Intern, advised by Jill Dimond

- Built and conducted (remote) usability testing of a moderation system.
- Based on the usability testing results, designed mockups and further developed the moderation system.

University of Michigan

Sept. 2018 - Present

Research Assistant

- Currently researching how to design and build novel privacy and consent mechanisms that protect people's consent and privacy in user-to-system and user-to-user interactions.
- Using social science theories, system-building, interviews, and surveys, uncovered how lack of consent can lead to a wide range of problems on social media, with users wanting fine-grained and usable privacy and safety tools [c2, c4].
- Built ML models to identify potential Russian trolls on Twitter, using an unbalanced dataset of 2.2K Russian troll accounts released by Twitter and 170K control accounts [c3].

Haystack Group, MIT

Apr. 2017 - Apr. 2018

Undergraduate Research, advised by Amy X. Zhang and David Karger

- Investigated how various factors affect the outcome of Request for Comments (RfC), a deliberative discussion on Wikipedia, by using mixed methods: 1) interviewing Wikipedia editors and 2) creating and quantitatively analyzing an English RfC dataset [c5].

MIT App Inventor, MIT

Oct. 2016 - May 2017

Undergraduate Research, advised by Paul Medlock-Walton and Hal Abelson

- Enabled novice programmers to create modular code in the App Inventor, by developing customized blocks within the system that can execute any functions of an imported API.
- Implemented virtual reality (VR) blocks in the App Inventor to help novice users build VR apps [c6].

Soft Active Materials Lab, MIT

Sept. 2016 - Feb. 2017

Undergraduate Research, advised by Hyunwoo Yuk

- Developed 3D printing based soft robotic hands with stand-alone actuation and control system.
- Implemented the software interface for precise 3D printing for advanced soft materials.
